TLC's new online estimate tool

TLC has launched an online tool to help customers estimate the lines cost component of their retail bill and better understand their total energy costs as billed by their retailer.

The easy-to-use calculator utilises a range of sources (including your most recent bill, publicly available information and prior period energy consumption data) to produce the estimate.

Visit thelinescompany.co.nz/lines-charges to have a play with their super-handy tool!

The WESCT trustees wish you a safe, happy and refreshing summer break. We'll be back to continue to grow and

enhance our community asset for the sustainable benefit of WESCT Customers in 2022.
