WESCT Completes TLC Director reviews

One of WESCT's roles is to ensure The Lines Company (TLC) is well governed so shareholders in our community benefit from a successful, efficient and reliable electricity distribution system.

This month we completed the performance review process of the TLC Directors. This is a confidential process led by WESCT Chair William Oliver and Trustees.

TLC's Statement of Corporate Intent published

WESCT Trustees provided input to TLC's annual Statement of Corporate Intent (SCI).

The SCI is a key reference document for discussions between WESCT Trustees and TLC's Board. It lays out TLC's plans for the year.

You can learn about the roles of the WESCT Trustees and TLC's priorities for our district this year on our website.

Kahumoe Kaupapa

– The PJ Project to help keep locals warm

Kahumoe Kaupapa – The PJ Project will distribute 100's of new winter pyjamas to families throughout TLC's network region in early August.

For information on the appeal and to see how you can donate, visit Maru on Facebook @maruenergytrust

MARU Trust's Jo Meads leading the PJ Project

Influx boosts income from outside the region

TLC subsidiary Influx Energy Data Limited (Influx), is the fourth largest electricity metering services business in New Zealand, bringing in valuable income from across NZ.

80% of Influx's revenue comes from outside the network area. Influx is the preferred meter provider for NZ's major domestic solar energy providers.

Save energy, save money

If you want advice on being warm this winter TLC have a range of energy saving tips for you.

Their website, thelinescompany.co.nz/save-energy/, has handy tools where you can see easy savings around the home, and you can work out your hourly appliance costs to make smart decisions about power savings.
